PROJECTS

Learning Management System (LMS) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Clerk Authentication, REST API

- Built a full-stack Learning Management System where users can browse, enroll, and access online courses.
- Implemented secure authentication and user management using Clerk, including role-based access (student / educator).
- Developed RESTful APIs with Express.js for course creation, user management, and enrollment features.
- Integrated MongoDB database to store users, courses, and course related data.
- Created an educator dashboard allowing instructors to publish and manage courses.

Airbnb Full Stack Web Application | [Github](#)

- Secure authentication for user signup and login.
- Full CRUD functionality for hosts to manage property listings.
- Advanced search and filtering by location, price, and category to enhance user experience.
- Responsive, mobile-friendly UI using Bootstrap and Material UI, ensuring seamless usability across all devices.
- MongoDB Atlas for a scalable, cloud-hosted database solution with modular backend APIs and a clean, maintainable architecture.
